# DENSITY ALTITUDE EXPLAINED SOLUTIONS

## Exercice-1

Pressure Altitude QNH	993		
( QNE - QNH ) x 27 =		....	[ft]
( 1013 - 993 ) x 27 =		540	[ft]
Altitude + ft =		....	[ft]
709 + 540 =		1249	[ft]

## Standard Temperature at 709 ft

ISO MSL - [ Altit. * ( 2 / 1000 ) =	....	[°C]
15 - [ 709 * ( 2 / 1000 ) =	13.6	[°C]

## Density Altitude at 709 with OAT 31 [°C]

120 x ( OAT Temp. - Temp. ISO ) =	....	[ft]
120 x ( 31 - 13.582 ) =	2090.2	[ft]
PA + ft =	....	[ft]
1249 + 2090 =	3339	[ft]

## Exercice-3

Pressure Altitude with QNH	1035		
( QNE - QNH ) x 27 =		....	[ft]
( 1013 - 1035 ) x 27 =		-594	[ft]
Altitude + ft =		....	[ft]
233 + -594 =		-361	[ft]

## Standard Temperature at 233 ft

ISO MSL - [ Altit. * ( 2 / 1000 ) =	....	[°C]
15 - [ 233 * ( 2 / 1000 ) =	14.5	[°C]

## Density Altitude at 233 with OAT 3 [°C]

120 x ( OAT Temp. - Temp. ISO ) =	....	[ft]
120 x ( 3 - 14.534 ) =	-1384	[ft]
PA + ft =	....	[ft]
-361 + -1384 =	-1745	[ft]

## Exercice-2

Pressure Altitude QNH	1000		
( QNE - QNH ) x 27 =		....	[ft]
( 1013 - 1000 ) x 27 =		351	[ft]
Altitude + ft =		....	[ft]
410 + 351 =		761	[ft]

## Standard Temperature at 410 ft

ISO MSL - [ Altit. * ( 2 / 1000 ) =	....	[°C]
15 - [ 410 * ( 2 / 1000 ) =	14.2	[°C]

## Density Altitude at 410 with OAT -2 [°C]

120 x ( OAT Temp. - Temp. ISO ) =	....	[ft]
120 x ( -2 - 14.18 ) =	-1942	[ft]
PA + ft =	....	[ft]
761 + -1942 =	-1181	[ft]

## Exercice-4

Pressure Altitude with QNH	987		
( QNE - QNH ) x 27 =		....	[ft]
( 1013 - 987 ) x 27 =		702	[ft]
Altitude + ft =		....	[ft]
3060 + 702 =		3762	[ft]

## Standard Temperature at 3060 ft

ISO MSL - [ Altit. * ( 2 / 1000 ) =	....	[°C]
15 - [ 3060 * ( 2 / 1000 ) =	8.88	[°C]

## Density Altitude at 3060 with OAT -8 [°C]

120 x ( OAT Temp. - Temp. ISO ) =	....	[ft]
120 x ( -8 - 8.88 ) =	-2026	[ft]
PA + ft =	....	[ft]
3762 + -2026 =	1736	[ft]

**DENSITY ALTITUDE EXPLAINED SOLUTIONS**

**Exercice-5**

Pressure Altitude QNH 1002

$$( QNE - QNH ) \times 27 = \dots \text{ [ft]}$$

$$( 1013 - 1002 ) \times 27 = 297 \text{ [ft]}$$

Altitude + ft = \dots [ft]

$$1249 + 297 = 1546 \text{ [ft]}$$

Standard Temperature at 1249 ft

$$\text{ISO MSL} - [\text{Altit.} \times ( 2 / 1000 )] = \dots \text{ [}^\circ\text{C]}$$

$$15 - [ 1249 \times ( 2 / 1000 )] = 12.5 \text{ [}^\circ\text{C]}$$

Density Altitude at 1249 with OAT 14 [°C]

$$120 \times (\text{OAT Temp.} - \text{Temp. ISO}) = \dots \text{ [ft]}$$

$$120 \times ( 14 - 12.502 ) = 179.76 \text{ [ft]}$$

PA + ft = \dots [ft]

$$1546 + 180 = 1726 \text{ [ft]}$$

**Exercice-7**

Pressure Altitude with QNH 1035

$$( QNE - QNH ) \times 27 = \dots \text{ [ft]}$$

$$( 1013 - 1035 ) \times 27 = -594 \text{ [ft]}$$

Altitude + ft = \dots [ft]

$$7763 + -594 = 7169 \text{ [ft]}$$

Standard Temperature at 7763 ft

$$\text{ISO MSL} - [\text{Altit.} \times ( 2 / 1000 )] = \dots \text{ [}^\circ\text{C]}$$

$$15 - [ 7763 \times ( 2 / 1000 )] = -0.5 \text{ [}^\circ\text{C]}$$

Density Altitude at 7763 with OAT 1 [°C]

$$120 \times (\text{OAT Temp.} - \text{Temp. ISO}) = \dots \text{ [ft]}$$

$$120 \times ( 1 - -0.526 ) = 183.12 \text{ [ft]}$$

PA + ft = \dots [ft]

$$7169 + 183 = 7352 \text{ [ft]}$$

**Exercice-6**

Pressure Altitude QNH 980

$$( QNE - QNH ) \times 27 = \dots \text{ [ft]}$$

$$( 1013 - 980 ) \times 27 = 891 \text{ [ft]}$$

Altitude + ft = \dots [ft]

$$5362 + 891 = 6253 \text{ [ft]}$$

Standard Temperature at 5362 ft

$$\text{ISO MSL} - [\text{Altit.} \times ( 2 / 1000 )] = \dots \text{ [}^\circ\text{C]}$$

$$15 - [ 5362 \times ( 2 / 1000 )] = 4.28 \text{ [}^\circ\text{C]}$$

Density Altitude at 5362 with OAT 33 [°C]

$$120 \times (\text{OAT Temp.} - \text{Temp. ISO}) = \dots \text{ [ft]}$$

$$120 \times ( 33 - 4.276 ) = 3446.9 \text{ [ft]}$$

PA + ft = \dots [ft]

$$6253 + 3447 = 9700 \text{ [ft]}$$

**Exercice-8**

Pressure Altitude with QNH 1025

$$( QNE - QNH ) \times 27 = \dots \text{ [ft]}$$

$$( 1013 - 1025 ) \times 27 = -324 \text{ [ft]}$$

Altitude + ft = \dots [ft]

$$2607 + -324 = 2283 \text{ [ft]}$$

Standard Temperature at 2607 ft

$$\text{ISO MSL} - [\text{Altit.} \times ( 2 / 1000 )] = \dots \text{ [}^\circ\text{C]}$$

$$15 - [ 2607 \times ( 2 / 1000 )] = 9.79 \text{ [}^\circ\text{C]}$$

Density Altitude at 2607 with OAT 18 [°C]

$$120 \times (\text{OAT Temp.} - \text{Temp. ISO}) = \dots \text{ [ft]}$$

$$120 \times ( 18 - 9.786 ) = 985.68 \text{ [ft]}$$

PA + ft = \dots [ft]

$$2283 + 986 = 3269 \text{ [ft]}$$
