DENSITY ALTITUDE EXPLAINED SOLUTIONS

Exercice-1

Pressure Altitude QNH 1029
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 1029) \times 27 = -432$ [ft]
 Altitude + ft = \dots [ft]
 579 + -432 = 147 [ft]

Standard Temperature at 579 ft
 ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [579 * (2 / 1000) = 13.8 [°C]

Density Altitude at 579 with OAT 31 [°C]
 $120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (31 - 13.842) = 2059$ [ft]
 PA + ft = \dots [ft]
 147 + 2059 = 2206 [ft]

Exercice-3

Pressure Altitude with QNH 993
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 993) \times 27 = 540$ [ft]
 Altitude + ft = \dots [ft]
 5733 + 540 = 6273 [ft]

Standard Temperature at 5733 ft
 ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [5733 * (2 / 1000) = 3.53 [°C]

Density Altitude at 5733 with OAT -1 [°C]
 $120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (-1 - 3.534) = -544.1$ [ft]
 PA + ft = \dots [ft]
 6273 + -544 = 5729 [ft]

Exercice-2

Pressure Altitude QNH 1029
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 1029) \times 27 = -432$ [ft]
 Altitude + ft = \dots [ft]
 6039 + -432 = 5607 [ft]

Standard Temperature at 6039 ft
 ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [6039 * (2 / 1000) = 2.92 [°C]

Density Altitude at 6039 with OAT 3 [°C]
 $120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (3 - 2.922) = 9.36$ [ft]
 PA + ft = \dots [ft]
 5607 + 9 = 5616 [ft]

Exercice-4

Pressure Altitude with QNH 1024
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 1024) \times 27 = -297$ [ft]
 Altitude + ft = \dots [ft]
 1801 + -297 = 1504 [ft]

Standard Temperature at 1801 ft
 ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [1801 * (2 / 1000) = 11.4 [°C]

Density Altitude at 1801 with OAT 16 [°C]
 $120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (16 - 11.398) = 552.24$ [ft]
 PA + ft = \dots [ft]
 1504 + 552 = 2056 [ft]

DENSITY ALTITUDE EXPLAINED SOLUTIONS

Exercice-5

Pressure Altitude QNH 987
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 987) \times 27 = 702$ [ft]
 Altitude + ft = \dots [ft]
 6361 + 702 = 7063 [ft]

Stanard Temperature at 6361 ft

ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [6361 * (2 / 1000) = 2.28 [°C]

Density Altitude at 6361 with OAT 21 [°C]

$120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (21 - 2.278) = 2246.6$ [ft]
 PA + ft = \dots [ft]
 7063 + 2247 = 9310 [ft]

Exercice-7

Pressure Altitude with QNH 995
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 995) \times 27 = 486$ [ft]
 Altitude + ft = \dots [ft]
 472 + 486 = 958 [ft]

Stanard Temperature at 472 ft

ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [472 * (2 / 1000) = 14.1 [°C]

Density Altitude at 472 with OAI -7 [°C]

$120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (-7 - 14.056) = -2527$ [ft]
 PA + ft = \dots [ft]
 958 + -2527 = -1569 [ft]

Exercice-6

Pressure Altitude QNH 981
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 981) \times 27 = 864$ [ft]
 Altitude + ft = \dots [ft]
 3111 + 864 = 3975 [ft]

Stanard Temperature at 3111 ft

ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [3111 * (2 / 1000) = 8.78 [°C]

Density Altitude at 3111 with OAT 22 [°C]

$120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (22 - 8.778) = 1586.6$ [ft]
 PA + ft = \dots [ft]
 3975 + 1587 = 5562 [ft]

Exercice-8

Pressure Altitude with QNH 997
 $(QNE - QNH) \times 27 = \dots$ [ft]
 $(1013 - 997) \times 27 = 432$ [ft]
 Altitude + ft = \dots [ft]
 2708 + 432 = 3140 [ft]

Stanard Temperature at 2708 ft

ISO MSL - [Altit. * (2 / 1000) = \dots [°C]
 15 - [2708 * (2 / 1000) = 9.58 [°C]

Density Altitude at 2708 with OAI 16 [°C]

$120 \times (OAT \text{ Temp.} - \text{Temp. ISO}) = \dots$ [ft]
 $120 \times (16 - 9.584) = 769.92$ [ft]
 PA + ft = \dots [ft]
 3140 + 770 = 3910 [ft]
